

TTM4205 reference group meeting on 20-10-2025

Attendees: Tjerand, Caroline, Tom, Jo, and Anders

Topics that we discussed:

- Lectures
 - We decided to make November 10 a presentation day as well
 - Otherwise everything seems to be going well in the course
- Exercise class
 - There are quite a few people showing up on a regular basis
 - Most people show up in the lecture room instead of in the lab
 - Most people managed the setup, but not everyone has started the lab
 - We can invite for another lab setup session just in case it is useful
 - We will offer extra weekly exercise sessions from November 7
- Assignments
 - Weekly: most people have started, some are done with padding oracles
 - Lab: some have started but not all, seems to be going okay so far
 - Essay: we have some group already, waiting for more until the deadline
- Ed Forum
 - A handful questions about the lab so far, no big issues
